SUMMARY

Computer Science undergraduate specializing in Cloud Technology, with hands-on experience in cloud computing, AI/ML, data analytics, and computational research. Experienced with GCP, AWS, Azure through hands-on labs, with a growing focus on cloud infrastructure, scalable systems, and cloud- based AI/ ML solutions. Also experienced in bioinformatics and computational drug discovery. Strong interest in Cloud Engineering, DevOps, AI/ML, and Data Engineering,

EXPERIENCE

Bioinformatics Researcher 2023 - 2024

Pancreatic Cancer Drug Candidate from Bangle Bioactive Compound

- Conducted an in silico drug discovery study investigating zingiberenol from *Zingiber cassumunar* as a potential pancreatic cancer drug candidate. Using tools such as PyRx, PharmMapper, ERRAT, SwissADME, and ProTox
- Presented research findings in scientific competitions, achieving Semi Grand Award at I2ASPO 2023 and Gold Medal at ISIF 2023, I2ASPO 2023, AISEEF 2024.

EDUCATION

Computer Science Undergraduate - Cloud Technology 2024 - 2028

Bina Nusantara University - GPA: 3.06 / 4.00

- Software DevOps in Cloud | App Dev in Cloud | Cloud Services | Intro to Cloud Security

AWS re/Start Learner - Batch 16 09/2026 - Present

Orbit Future Academy x Amazon Web Services

- AWS Core Services | Linux & Networking | Python Scripting | Cloud Security

CERTIFICATES

Google Cloud Computing Foundations Certificate ↗ 05/2026

Google

SKILLS

Cloud Computing: AWS | GCP | Azure

Networking: TCP/IP | Subnetting | Core Protocols

Tools: Docker, Kubernetes, Git, CI/CD

Mobile & Web Development:

Programming: C | C++ | Java | Python | PHP | SQL

Bioinformatics

AI/ML
